

# SAFETY DATA SHEET MAXIMUS HD-E 5W-30

SECTION 1: Identification of the substance/mixture and of the company/undertaking		
1.1. Product identifier		
Product name	MAXIMUS HD-E 5W-30	
Product number	11362	
1.2. Relevant identified uses of th	e substance or mixture and uses advised against	
Identified uses	Engine oil.	
Uses advised against	This product must not be used in applications other than those recommended in Section 1, without first seeking the advice of the supplier. This product is not to be used as a solvent or cleaning agent; for lighting or brightening fires; as a skin cleanser. This product is designed only to suit automotive applications and no provision is made for the requirements of aviation applications.	
1.3. Details of the supplier of the	safety data sheet	
Supplier	PETROL OFİSİ A.Ş. Ünalan Mahallesi, Libadiye Caddesi No: 82F Kat: 2-3-4, 34700 Üsküdar/ Istanbul Tel: +90 850 339 1919 Fax: +90 216 275 3854 madeniyag@petrolofisi.com.tr	
Contact person	Customer Services: madeniyag@petrolofisi.com.tr	
Manufacturer	PETROL OFİSİ A.Ş. Ünalan Mahallesi, Libadiye Caddesi No: 82F Kat: 2-3-4, 34700 Üsküdar/ Istanbul Tel: +90 850 339 1919 Fax: +90 216 275 3854 madeniyag@petrolofisi.com.tr	
1.4. Emergency telephone number	ər	
Emergency telephone	Madeni Yağ Customer Services: 0850 339 1919 (working hours)	
National emergency telephone number	Emergency Medical Services: 112	
SECTION 2: Hazards identification	n	
2.1. Classification of the substance	æ or mixture	
Classification (EC 1272/2008) Physical hazards	Not Classified	
Health hazards	Not Classified	
Environmental hazards	Aquatic Chronic 3 - H412	
Environmental	The product is mildly toxic to aquatic organisms.	
2.2. Label elements Hazard statements	H412 Harmful to aquatic life with long lasting effects.	

According to the REACH etc. (Amendment etc.) (EU Exit) Regulations 2020 No. 1577, as amended. Commission Regulation (EU) 2020/878 of 18 June 2020.

Precautionary statements	P401 Store in accordance with national regulations.
	P270 Do not eat, drink or smoke when using this product.
	P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.
	P273 Avoid release to the environment.
	P501 Dispose of contents/ container in accordance with national regulations.

#### 2.3. Other hazards

This substance is not classified as PBT or vPvB according to current EU criteria.

SECTION 3: Composition/information on ingredients

Distillates (petroleum), hydrotreated	heavy paraffinic baseoil		40-60%
CAS number: 64742-54-7	EC number: 265-157-1	REACH registration number: 01- 2119484627-25-0065	
Classification			
Asp. Tox. 1 - H304			
1-decene homopolymer hydrogenate	ed		25-40%
CAS number: 68037-01-4			
<b>Classification</b> Asp. Tox. 1 - H304			
Mineral oil (mixture)			10-209
040			
CAS number: —

Composition comments

Some substances are not classified by legistlation. They are self classified by the manufacturer. The DMSO extract by IP 346 of the oil is less than 3%

Ingredient notes	If REACH registration numbers do not appear the substance is either exempt from registration, does not meet the minimum volume threshold for registration, the registration date has not yet come due or this information is proprietary.
SECTION 4: First aid measures	

4.1. Description of first aid measures		
General information	Get medical attention if any discomfort continues.	
Inhalation	If in doubt, get medical attention promptly.	
Ingestion	Do not induce vomiting. Rinse mouth thoroughly with water. Get medical attention if any discomfort continues.	
Skin contact	Get medical attention if any discomfort continues.	
Eye contact	IF IN EYES: Remove contact lenses, if present and easy to do. Continue rinsing. Continue to rinse for at least 15 minutes and get medical attention. Do not rub eye. Consult a physician for specific advice. Show this Safety Data Sheet to the medical personnel.	
Protection of first aiders	First aid personnel should wear appropriate protective equipment during any rescue.	
4.2. Most important symptoms and	d effects, both acute and delayed	
General information	See Section 11 for additional information on health hazards.	
Inhalation	No specific symptoms known.	
Ingestion	No specific symptoms known.	
Skin contact	No specific symptoms known.	
Eye contact	No specific symptoms known.	
4.3. Indication of any immediate medical attention and special treatment needed		
Notes for the doctor	Treat symptomatically.	
Specific treatments	Treat symptomatically.	
SECTION 5: Firefighting measure	\$	
5.1. Extinguishing media		
Suitable extinguishing media	Extinguish with alcohol-resistant foam, carbon dioxide or dry powder.	
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.	
5.2. Special hazards arising from the substance or mixture		
Specific hazards	A solid stream of water will spread the burning material. Material creates a special hazard because it floats on water. See section 10 for additional information. Water may cause splattering. Container may rupture on heating.	
Hazardous combustion products	Carbon dioxide (CO2). Carbon monoxide (CO). A complex mixture of airborne solids, liquids and gases can be released.	
5.3. Advice for firefighters		
Protective actions during firefighting	Avoid breathing fire gases or vapours.	

According to the REACH etc. (Amendment etc.) (EU Exit) Regulations 2020 No. 1577, as amended. Commission Regulation (EU) 2020/878 of 18 June 2020.

**Special protective equipment for** Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. **firefighters** 

SECTION 6: Accidental release measures 6.1. Personal precautions, protective equipment and emergency procedures Personal precautions Wear protective clothing as described in Section 8 of this safety data sheet. For non-emergency personnel Necessary precautions should be taken to ensure that non-educated personnel do not intervene. For emergency responders Wear protective clothing as shown in section 8 of this safety data sheet. Notification: In case of spillage, notify the local authorities as appropriate or as necessary. Stop the leakage source if it can be done without risk.Limit spillage to prevent further contamination of soil, surface or ground water.Remove any spilled material as soon as possible by following the precautions in the section Exposure Controls / Personal Protection.Use suitable techniques such as non-flammable absorbent materials or pumping.When possible or appropriate, remove the contaminated soil from the area.Place contaminated products in disposable boxes and dispose of in accordance with regulations. If a heated material is spilled, allow it to cool before handling with disposal methods. 6.2. Environmental precautions Environmental precautions Do not discharge into drains or watercourses or onto the ground. 6.3. Methods and material for containment and cleaning up Methods for cleaning up Stop leak if possible without risk. Absorb in vermiculite, dry sand or earth and place into containers. Flush contaminated area with plenty of water. Avoid the spillage or runoff entering drains, sewers or watercourses. Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible. 6.4. Reference to other sections Reference to other sections For personal protection, see Section 8. See Section 1 for emergency contact information. For waste disposal, see Section 13. See Section 7 for more information on safe handling. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. **SECTION 7: Handling and storage** 7.1. Precautions for safe handling Usage precautions Avoid spilling. Provide adequate ventilation. Advice on general occupational Good personal hygiene procedures should be implemented. Avoid breathing vapors / mist. Do not eat, drink or smoke when using this product. Wash after use and before eating, smoking and using the toilet. hygiene 7.2. Conditions for safe storage, including any incompatibilities Storage precautions Store in a demarcated bunded area to prevent release to drains and/or watercourses. Store away from incompatible materials (see Section 10). Bund storage facilities to prevent soil and water pollution in the event of spillage. Keep only in the original container. Protect from freezing and direct sunlight. Storage class Chemical storage. 7.3. Specific end use(s) Specific end use(s) The identified uses for this product are detailed in Section 1.2. Usage description The product must be used as specified in the data sheet. SECTION 8: Exposure controls/Personal protection

8.1. Control parameters

# According to the REACH etc. (Amendment etc.) (EU Exit) Regulations 2020 No. 1577, as amended. Commission Regulation (EU) 2020/878 of 18 June 2020.

#### Occupational exposure limits

Mineral Oil- inhalable fraction: TWA : 5 mg/m3 (Source:US. ACGIH Threshold Limit Values (02 2012)) Distillates (petroleum) hydrotreated heavy paraffinic: EU OEL (Europe) TWA: 5 mg/m3, 8 hours. Distillates (petroleum) solvent-dewaxed heavy paraffinic: EU OEL (Europe) TWA: 5 mg/m3, 8 hours/ STEL: 10 mg/m3, 15 minutes.

#### Distillates (petroleum), hydrotreated heavy paraffinic baseoil

There is no available data.

Ingredient comments	No other information known.
Biological limit values	No information available.
DNEL	No information available.
DMEL	No information available.
PNEC	No information available.

#### Distillates (petroleum), hydrotreated heavy paraffinic baseoil (CAS: 64742-54-7)

Ingredient comments	There is no available data.
Biological limit values	There is no available data.
DNEL	Workers - Inhalation; Long term systemic effects: 2,7 (8h) mg/m <sup>3</sup> Workers - Inhalation; Long term local effects: 5,4 (8h) mg/m <sup>3</sup> Consumer - Inhalation; Long term local effects: 1,2 (24h) mg/m <sup>3</sup> Consumer - Oral; Long term systemic effects: 0,74 (24h) mg/kg/day Workers - Dermal; Long term systemic effects: 1,0 (8h) mg/kg
DMEL	No information available.
PNEC	No information available.

#### 8.2. Exposure controls

appropriate skin cream to prevent drying of skin. When using do not eat, drink or smoke.

Appropriate engineering controls Provide adequate ventilation. Avoid inhalation of vapours.

Personal protection	The effectiveness of personal protective equipment, together with other elements, depends on the degree of ventilation. Depending on the particular situation in question, Get professional support.
Eye/face protection	Wear chemical splash goggles. Wear face protection.
Hand protection	Wear protective gloves. Frequent changes are recommended.
Other skin and body protection	Avoid contact with skin. Wear apron or protective clothing in case of contact.
Hygiene measures	Provide eyewash station. Do not smoke in work area. Wash at the end of each work shift and before eating, smoking and using the toilet. Promptly remove any clothing that becomes contaminated. Use

According to the REACH etc. (Amendment etc.) (EU Exit) Regulations 2020 No. 1577, as amended. Commission Regulation (EU) 2020/878 of 18 June 2020.

Respiratory protection	If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are unsuitable (e.g. airborne concentrations are high, risk of oxygen deficiency, confined space) use appropriate positive pressure breathing apparatus. Where airfiltering respirators are suitable, select an appropriate combination of mask and filter. All respiratory protection equipment and use must be in accordance with local regulations.
Thermal hazards	If there is a risk of contact with hot product, all protective equipment worn should be suitable for use with high temperatures.
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. Store in a demarcated bunded area to prevent release to drains and/or watercourses. Residues and empty containers should be taken care of as hazardous waste according to local and national provisions. Keep container tightly sealed when not in use.

#### SECTION 9: Physical and chemical properties

9.1. Information on basic physica	l and chemical properties
Appearance	Liquid.
Colour	Brownish.
Odour	Odorless or slightly petroleum oil
Odour threshold	No specific test data are available.
рН	Scientifically unjustified.
Melting point	No specific test data are available.
Initial boiling point and range	No specific test data are available.
Flash point	~ 234°C OC (Open cup).
Evaporation rate	No specific test data are available.
Evaporation factor	No specific test data are available.
Flammability (solid, gas)	No specific test data are available.
Upper/lower flammability or explosive limits	No specific test data are available.
Other flammability	No specific test data are available.
Vapour pressure	No specific test data are available.
Vapour density	No specific test data are available.
Relative density	No specific test data are available.
Bulk density	~ 0,85 @ 15 °C g/ml
Solubility(ies)	Hydrocarbons.
Partition coefficient	No specific test data are available.
Auto-ignition temperature	No specific test data are available.
Decomposition Temperature	No specific test data are available.

According to the REACH etc. (Amendment etc.) (EU Exit) Regulations 2020 No. 1577, as amended. Commission Regulation (EU) 2020/878 of 18 June 2020.

Viscosity	9,3-12,5 @ 100°C°C
Explosive properties	No specific test data are available.
Explosive under the influence of a flame	No specific test data are available.
Oxidising properties	Not known.
Comments	No specific test data are available.
Particle characteristic	Not applicable
9.2. Other information	
Other information	No information required.
Refractive index	No specific test data are available.
Particle size	No specific test data are available.
Molecular weight	No specific test data are available.
Volatility	No specific test data are available.
Saturation concentration	No specific test data are available.
Critical temperature	No specific test data are available.
Volatile organic compound	No specific test data are available.
SECTION 10: Stability and reactivi	ity
10.1. Reactivity	
Reactivity	No test data specifically related to reactivity available for this product or its ingredients.
10.2. Chemical stability	
Stability	Stable at normal ambient temperatures and when used as recommended.
10.3. Possibility of hazardous reac	tions
Possibility of hazardous reactions	Under normal conditions of storage and use, no hazardous reactions will occur.
10.4. Conditions to avoid	
Conditions to avoid	Keep away from heat, sparks and open flame. Avoid contact with strong oxidising agents.
10.5. Incompatible materials	
Materials to avoid	Strong oxidising agents. Strong acids. Inorganic halides. Strong alkalis.
10.6. Hazardous decomposition pr	oducts
Hazardous decomposition products	In the event of incomplete combustion, smoke, carbon dioxide and carbon monoxide are formed. Oxides of nitrogen.
SECTION 11: Toxicological inform	ation
11.1. Information on toxicological e	effects
Information on hazard classes as	

Information on hazard classes as defined in Regulation (EC) No 1272/2008

Other health effects	Based on available data the classification criteria are not met.
Toxicological effects	Based on available data the classification criteria are not met.
Acute toxicity - oral	
Summary	Based on available data the classification criteria are not met.
Notes (oral LD₅₀)	Based on available data the classification criteria are not met.
Acute toxicity - dermal	
Summary	Based on available data the classification criteria are not met.
Notes (dermal LD₅₀)	Based on available data the classification criteria are not met.
Acute toxicity - inhalation	Based on available data the classification criteria are not met.
Notes (inhalation LC₅₀)	Based on available data the classification criteria are not met.
Skin corrosion/irritation Summary	Based on available data the classification criteria are not met.
Skin corrosion/irritation	Based on available data the classification criteria are not met.
Animal data	Based on available data the classification criteria are not met.
Human skin model test	Based on available data the classification criteria are not met.
Extreme pH	Based on available data the classification criteria are not met.
Serious eye damage/irritation	
Summary	Based on available data the classification criteria are not met.
Serious eye damage/irritation	Based on available data the classification criteria are not met.
Respiratory sensitisation	
Summary	Based on available data the classification criteria are not met.
Respiratory sensitisation	Based on available data the classification criteria are not met.
Skin sensitisation	
Summary	Based on available data the classification criteria are not met.
Skin sensitisation	Based on available data the classification criteria are not met.
Germ cell mutagenicity Summary	Based on available data the classification criteria are not met.
Genotoxicity - in vitro	Based on available data the classification criteria are not met.
Genotoxicity - in vivo	Based on available data the classification criteria are not met.
•	Dased on available data the classification chiena are not met.
Carcinogenicity Summary	Based on available data the classification criteria are not met.
Carcinogenicity	Based on available data the classification criteria are not met.
Target organ for carcinogenicity	No specific target organs known.
IARC carcinogenicity	Not listed.

#### According to the REACH etc. (Amendment etc.) (EU Exit) Regulations 2020 No. 1577, as amended. Commission Regulation (EU) 2020/878 of 18 June 2020.

NTP carcinogenicity	Not listed.
Reproductive toxicity	
Summary	Based on available data the classification criteria are not met.
Reproductive toxicity - fertility	Based on available data the classification criteria are not met.
Reproductive toxicity - development	Based on available data the classification criteria are not met.
Specific target organ toxicity - sing	le exposure
Summary	Based on available data the classification criteria are not met.
STOT - single exposure	Based on available data the classification criteria are not met.
Target organs	No specific target organs known.
Specific target organ toxicity - repe	eated exposure
Summary	Based on available data the classification criteria are not met.
STOT - repeated exposure	Based on available data the classification criteria are not met.
Target organs	No specific target organs known.
Aspiration hazard	
Summary	Based on available data the classification criteria are not met.
Aspiration hazard	Based on available data the classification criteria are not met.
Toxicokinetics	No other information known.
General information	No other information known.
Inhalation	No other information known.
Ingestion	No other information known.
Skin contact	No other information known.
Eye contact	No other information known.
Acute and chronic health hazards	No other information known.
Route of exposure	No other information known.
Target organs	No specific target organs known.
Medical symptoms	No other information known.
Medical considerations	No other information known.
11.2 Information on other hazards	
Information on other hazards	No available information.
Toxicological information on ingred	lients.

Toxicological information on ingredients.

Distillates (petroleum), hydrotreated heavy paraffinic baseoil

Other health effects

No information required.

Toxicological effects	Information given is based on data of the components and of similar products.
Acute toxicity - oral	
Summary	Based on available data the classification criteria are not met.
Notes (oral LD₅₀)	LD₅₀ >5000 (OECD 401)/API 1982a mg/kg, Oral, Rat
Acute toxicity - dermal	
Summary	Based on available data the classification criteria are not met.
Notes (dermal LD₅₀)	LD₅₀ >5000 (OECD 402)/API 1982a mg/kg, Dermal, Rabbit
Acute toxicity - inhalation	
Summary	Based on available data the classification criteria are not met.
Notes (inhalation LC₅₀)	LC50, 4h 5,53 (OECD 403)/Exxon Biomedical Sciences, Inc.(1988a) mg/l, Inhalation, Rat
Skin corrosion/irritation	
Summary	Based on available data the classification criteria are not met.
Skin corrosion/irritation	Based on available data the classification criteria are not met.
Animal data	Based on available data the classification criteria are not met.
Human skin model test	Based on available data the classification criteria are not met.
Extreme pH	Based on available data the classification criteria are not met.
Serious eye damage/irritation	
Summary	Based on available data the classification criteria are not met.
Serious eye damage/irritation	Based on available data the classification criteria are not met.
Respiratory sensitisation	
Summary	Based on available data the classification criteria are not met.
Respiratory sensitisation	Based on available data the classification criteria are not met.
Skin sensitisation	
Summary	Based on available data the classification criteria are not met.
Skin sensitisation	Based on available data the classification criteria are not met.
Germ cell mutagenicity	
Summary	Based on available data the classification criteria are not met.
Genotoxicity - in vitro	Based on available data the classification criteria are not met.
Genotoxicity - in vivo	Based on available data the classification criteria are not met.
Carcinogenicity	
Summary	Based on available data the classification criteria are not met.
Carcinogenicity	Based on available data the classification criteria are not met.
Target organ for carcinogenicity	No specific target organs known.

## According to the REACH etc. (Amendment etc.) (EU Exit) Regulations 2020 No. 1577, as amended. Commission Regulation (EU) 2020/878 of 18 June 2020.

IARC carcinogenicity	Not listed.
NTP carcinogenicity	Not listed.
Reproductive toxicity	
Summary	Based on available data the classification criteria are not met.
Reproductive toxicity - fertility	Based on available data the classification criteria are not met.
Reproductive toxicity - development	Based on available data the classification criteria are not met.
Specific target organ toxicity -	single exposure
Summary	Based on available data the classification criteria are not met.
STOT - single exposure	Based on available data the classification criteria are not met.
Target organs	No specific target organs known.
Specific target organ toxicity -	repeated exposure
Summary	Based on available data the classification criteria are not met.
STOT - repeated exposure	Based on available data the classification criteria are not met.
Target organs	No specific target organs known.
Aspiration hazard	
Summary	Slight irritation of the respiratory tract may occur, if mists are inhaled.
Aspiration hazard	May be fatal if swallowed and enters airways.
Aspiration hazard	May be fatal if swallowed and enters airways.
Aspiration hazard Toxicokinetics	May be fatal if swallowed and enters airways. No information required.
Toxicokinetics	No information required.
Toxicokinetics General information	No information required.
Toxicokinetics General information Inhalation	No information required. No information required. No information required.
Toxicokinetics General information Inhalation Ingestion	No information required. No information required. No information required. No information required.
Toxicokinetics General information Inhalation Ingestion Skin contact	No information required. No information required. No information required. No information required. No information required.
Toxicokinetics General information Inhalation Ingestion Skin contact Eye contact Acute and chronic health	No information required. No information required. No information required. No information required. No information required. No information required.

No information required. No information required. No information required. No information required. No information required. No information required. No information required.

1-decene homopolymer hydrogenated

Acute toxicity - oral

According to the REACH etc. (Amendment etc.) (EU Exit) Regulations 2020 No. 1577, as amended. Commission Regulation (EU) 2020/878 of 18 June 2020.

Notes (oral LD₅₀)	LD₅₀ >5000 mg/kg, Oral, Rat
Acute toxicity - dermal	
Notes (dermal LD₅₀)	LD₅₀ >2000 mg/kg, Dermal, Rat
Acute toxicity - inhalation	
Notes (inhalation LC₅₀)	LC50 >5,2 (4h) mg/l, Inhalation, Rat
	Mineral oil (mixture)
Skin sensitisation	
Skin sensitisation	Classification: Not a skin sensitizer. (Read across) (Supplier information)
Specific target organ toxicity -	single exposure
STOT - single exposure	If material is misted or if vapors are generated from heating, exposure may cause irritation of mucous membranes and the upper respiratory tract. (Supplier information)
Aspiration hazard	
Aspiration hazard	Material can be aspirated into the lungs during the act of swallowing or vomiting. This could result in severe injury to the lungs and death. (Supplier information)
	Distillates (petroleum), hydrogenated heavy parafinic
Carcinogenicity	
Carcinogenicity	This product contains mineral oils which are severely refined and not considered carcinogenic. All of the oils in this product have been demonstrated to contain less than 3% extractables by the IP 346 test.
Aspiration hazard	
Aspiration hazard	Material can be aspirated into the lungs during the act of swallowing or vomiting. This could result in severe injury to the lungs and death. (Supplier information)
	bis(nonylphenyl)amine
Germ cell mutagenicity	
Genotoxicity - in vitro	This material has not exhibited mutagenic or genotoxic potential in laboratory tests. (Supplier information)
	Zinc O,O,O',O'-tetrakis(1,3dimethylbuthyl)bis(fosforodithioat)
Skin sensitisation	
Skin sensitisation	Classification: Not a skin sensitizer.
	Mineral oil
Acute toxicity - oral	
Notes (oral LD₅₀)	LD₅₀ >5000 mg/kg, Oral, Rat
Acute toxicity - dermal	
Notes (dermal LD₅₀)	LD₅₀ >2000 mg/kg, Dermal, Rabbit

Phenol, dodecyl-, branched

	eproductive toxicit	<ul> <li>Gestation to pregnant mice 6-13. days after di-tert-butyl-p-cresol up to 800 mg / kg / day, no teratogenic effect was observed. (Supplier information)</li> </ul>
SECTION 12: Ec	cological informatio	n
Ecotoxicity		May cause long lasting harmful effects to aquatic life.
	ation on ingradion	
Ecological Inform	nation on ingredien	
		Distillates (petroleum), hydrotreated heavy paraffinic baseoil
Ec	cotoxicity	Based on available data the classification criteria are not met.
12.1. Toxicity		
Toxicity		Harmful to aquatic life with long lasting effects.
Acute aquatic tox	xicity	
Summary		No other information known.
Acute toxicity - fis	sh	No other information known.
Acute toxicity - ad invertebrates	quatic	No other information known.
Acute toxicity - ac	quatic plants	No other information known.
Acute toxicity - m	nicroorganisms	No other information known.
Acute toxicity - te	errestrial	No other information known.
Chronic aquatic t	toxicity	
Summary	-	May cause long lasting harmful effects to aquatic life.
Chronic toxicity - stage	fish early life	No specific test data are available.

According to the REACH etc. (Amendment etc.) (EU Exit) Regulations 2020 No. 1577, as amended. Commission Regulation (EU) 2020/878 of 18 June 2020.

Short term toxicity - embryo and sac fry stages	No specific test data are available.
Chronic toxicity - aquatic invertebrates	No specific test data are available.
Toxicity to soil	No specific test data are available.
Toxicity to terrestrial plants	No specific test data are available.

Ecological information on ingredients.

Distillates (petroleum), hydrotreated heavy paraffinic baseoil

Toxicity	Based on available data the classification criteria are not met.
Acute aquatic toxicity	
Summary	Based on available data the classification criteria are not met.
Acute toxicity - fish	LL <sub>50</sub> , : >100 mg/l, Fish LL <sub>50</sub> , 96 (OECD 203) hours: >100 mg/l, Pimephales promelas (Fat-head Minnow)
Acute toxicity - aquatic invertebrates	LL₅₀, 24 (OECD 202) hours: >10000 mg/l, Gammarus pulex EL50, 24 (OECD 202) hours: >10000 mg/l, Daphnia magna
Acute toxicity - aquatic plants	No information required.
Acute toxicity - microorganisms	LL₅₀, : >100 mg/l, Micro-organisms
Acute toxicity - terrestrial	No information required.
Chronic aquatic toxicity	
Summary	Based on available data the classification criteria are not met.
Chronic toxicity - fish early life stage	No information required.
Short term toxicity - embryo and sac fry stages	No information required.
Chronic toxicity - aquatic invertebrates	No information required.
Toxicity to soil	No information required.
Toxicity to terrestrial plants	No information required.
	1-decene homopolymer hydrogenated
Acute aquatic toxicity	
Acute toxicity - fish	LC₅₀, 96 hour: >1000 mg/l, Salmo gairdneri (Rainbow trout) LC₅₀, 96 hour: >750 mg/l, Fathead Minnow
Acute toxicity - aquatic invertebrates	EC₅₀, 48 hour: 190 mg/l, Daphnia Magna

Acute toxicity - aquatic plants	NOELR, 72 hour: 1000 mg/l, Selenastrum capricornutum, Static test Method: OECD Test Guideline 201
	Mineral oil (mixture)

	Distillates (petroleum), hydrotreated heavy paraffinic baseoil		
Other adverse	This product contains components that have a harmful effect on the aquatic environment not allow to enter into soil, rivers or sewers.	t.Do	
SECTION 13: Disposal consid	ations		
13.1. Waste treatment method			
General information	The generation of waste should be minimised or avoided wherever possible. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labelled with their contents.		
Disposal methods	Collect and place in suitable waste disposal containers and seal securely. Dispose of waste to licens waste disposal site in accordance with the requirements of the local Waste Disposal Authority.	sed	
Waste class	The waste code classification is to be carried out according to the European Waste Catalogue (EWC	C).	
SECTION 14: Transport inform	ion		
General	The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).		
Road transport notes	Avoid releasing into the environment.
